*We tend to overestimate the effect of a technology in the short run
and underestimate the effect in the long run. _Roy Amara*

To our friends and families,

Thursday, October 5, 2017

Slideless is an early-stage enterprise software startup. Our [Digital Pathology Management System](#) (DPMS) helps Anatomic Pathology labs migrate from glass microscopes to digital imaging.

In September, Slideless doubled-down on its work with the Pathology and entrepreneurial communities:

- Slideless completed the [StartUp Health Masterclass](#), an invitation-only accelerator for life science businesses in New York City. The 2017 cohort included startups from four continents, who received training and feedback from a pool of full-time professional coaches, and a community of 100+ StartUp Health entrepreneurs.
- [Slideless has advanced to the semi-finals](#) of the Accelerate Michigan Innovation Competition. On November 16th, we'll join 36 companies competing for AMIC's million-dollar purse. Join us at Masonic Temple in Detroit - [click here for tickets](#).
- Slideless gave a paper and Grand Rounds at the [Moffitt Cancer Center](#) in Tampa, FL. We conducted Discovery Encounters with physicians, researchers, and administrators, and identified specific applications. We also met with Moffitt's vendor ecosystem to explore DPMS integration opportunities.
- September's enhancements to the DPMS include improved single-signon features; smoother, faster slide viewing; and new Pathology Imaging AppStore features for analytics developers adopting the [Open Algorithm Standard](#). Slideless' engineers are providing an open Cloud infrastructure for novel microscope and scanner developers, as well as a standalone, non-production configuration of the DPMS, for select research applications.

Slideless' [Digital Pathology Management System](#) streamlines the adoption of computer-aided diagnostics, so Pathologists can get the most out of their investments in slide scanners, storage, and enterprise IT infrastructure. More info at www.slideless.co, along with [previous newsletters](#) and our [free demo app](#).

Cheers,

Bob, Chris, David, Jeff, and Josh
